The **Silent University** opens up an alternative knowledge space, where “invisible knowledge” becomes visible – it is an open space where people of different backgrounds meet, share knowledge and where “new knowledge” can emerge.

The **Silent University** particularly invites asylum seekers and migrants to come and contribute their knowledge as well as establish contacts with scientists and universities. Young refugees are also very welcome to come and get involved.

The **KUNSTLABOR Graz** from uniT is looking forward to seeing you there!
